# CAUTIONARY STATEMENTS

## DISCLAIMER

Emperor Metals Inc. is a Canadian mineral exploration company listed on the Canadian Securities Exchange, or CSE, which is operated by CNSX Markets Inc. Neither the CSE nor its Market Regulator (as that term is defined in the Trading Rules and policies of the CSE) accepts responsibility for the adequacy or accuracy of information delivered in this presentation.

## INFORMATION ONLY, NO OFFER OR SOLICITATION, NO UNAUTHORIZED DISTRIBUTION

This presentation does not constitute an offer to sell or solicitation of an offer to buy any of the securities described herein. The sole purpose of this presentation in verbal, paper or electronic form is strictly for information. This document is strictly private and confidential, and is intended for the person to whom it is provided by Emperor Metals Inc. The contents of the document may not be copied, distributed or reproduced in whole or in part, nor passed to any third party, without the prior, written permission of Emperor Metals Inc.

## FORWARD LOOKING STATEMENTS

Certain statements and/or graphics in the Company's press releases, website information and corporate displays, among others, constitute "forward-looking statements". These statements are based on information currently available to the Company and the Company provides no assurance that actual results will meet management's expectations. Forward-looking statements include estimates and statements that describe the Company's future plans, objectives or goals, including words to the effect that the Company or management expects a stated condition or result to occur. Forward-looking statements may be identified by terms such as "believes", "anticipates", "expects", "estimates", "may", "could", "would", "will", or "plan", or their conditional or future forms.

Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties. Actual results relating to, among other things, results of exploration, project development, reclamation and capital costs of the Company's mineral properties, and the Company's financial condition and prospects, could differ materially from those currently anticipated in such statements for many reasons such as: changes in general economic conditions and conditions in the financial markets; changes in demand and prices for minerals; litigation, legislative, environmental and other judicial, regulatory, political and competitive developments; technological and operational difficulties encountered in connection with the activities of the Company; and other matters discussed in this presentation. This list is not exhaustive of the factors that may affect any of the Company's forward-looking statements. The Company does not undertake to update any forward-looking statement that may be made from time to time by the Company or on its behalf, except if required to do so by applicable securities laws. These and other factors should be considered carefully, and recipients should not place undue reliance on the Company's forward-looking statements.

## FORWARD-LOOKING STATEMENTS AND/OR INFORMATION RELATED TO EXPLORATION

Relating to exploration, the identification of exploration targets and any implied future investigation of such targets on the basis of specific geological, geochemical and geophysical evidence or trends are future-looking and subject to a variety of possible outcomes which may or may not include the discovery, or extension, or termination of mineralization. Further, areas around known mineralized intersections or surface showings may be marked by wording such as "open", "untested", "possible extension" or "exploration potential" or by symbols such as "?". Such wording or symbols should not be construed as a certainty that mineralization continues or that the character of mineralization (e.g. grade or thickness) will remain consistent from a known and measured data point. The key risks related to exploration in general are that chances of identifying economical reserves are extremely small.

## THIRD-PARTY INFORMATION

Certain statements and/or graphics in the Company's press releases, website information and corporate displays, among other materials, may contain third-party historical data and other information that have not been verified by Emperor Metals Inc. and may not be accurate or complete, therefore the information should not be relied upon. Power-Fardy and Breede, 2011.\* In particular, the Mineral Resource Estimate (MRE) constructed in 2011 is considered historical in nature as it was constructed prior to the most recent Canadian Institute of Mining and Metallurgy (CIM) standards (2014) and guidelines (2019) for mineral resources. In addition, the economic factors used to demonstrate reasonable prospects of eventual economic extraction for the MRE have changed since 2011. A qualified person has not done sufficient work to consider the MRE as a current. Emperor is not treating the historical MRE as current. The reader is cautioned not to treat it, or any part of it, as a current MRE.

## QUALIFIED PERSON, GOVERNANCE AND RISKS

John Florek, M.Sc., P.GEOL. & Michael Dufresne, M.Sc., P.Geol., P.Geo., serve as Qualified Persons, as defined by National Instrument NI 43-101, responsible for reviewing and approving the technical content of all materials publicly disclosed by Emperor Metals Inc., including the contents of this presentation.

# ABOUT EMPEROR METALS

## Gold Exploration in Québec

CSE: AUOZ  
OTCQB: EMAUF  
FRA: 9NH

- **FLAGSHIP DUQUESNE WEST GOLD PROJECT - 2011 HISTORICAL INFERRED MINERAL RESOURCE ESTIMATE:** 727,000 ounces of high-grade gold (5.42 g/t) with an average thickness of 5.71 m in 4.17 Mt, based on a 3 g/t cutoff, 2.5 m minimum thickness, and \$960/oz gold price.\*
- **TIER 1 JURISDICTION:** Abitibi Greenstone Belt in Rouyn-Noranda, Quebec. >200 M Oz produced, surrounded by underutilized mills and gold producers. All in drilling costs of < \$250 CAD per meter.
- **OPEN PIT MINE POTENTIAL:** Conceptual model suggests multi-million oz Au potential beyond the high-grade historical resource, supporting multiple production scenarios.
- **2023 DRILL RESULTS:** 10.8 m of 15.8 g/t Au, 11.7 m of 5.63 g/t Au, 10.65 m of 3.97 g/t Au, 25 m of 1.69 g/t Au.
- **2024 CONCEPTUAL OPEN PIT BULK TONNAGE CONFIRMED:** 21.7 m of 35.2 g/t Au, 52.1 m of 0.8 g/t Au, 68.3 m of 0.6 g/t Au, 2.5 m of 10.27 g/t Au, 24.8 m of 1.8 g/t Au, 23.5 m of 1.2 g/t Au.
- **100% OWNED LAC PELLETIER - NEAR TERM PRODUCTION OPPORTUNITY:** Historical resource of 227,000 oz @ 3.9 g/t Au, with production permits valid until 2030. ~\$70M CAD in past expenditures, including two bulk samples (2009–2010) with 96.3% average recovery and 105,000 m of drilling.
- **NEAR TERM MILESTONES:**
  - Updated Mineral Resource Estimate on the Duquesne West Gold Project: early Q2, 2025.
  - Drilling at Duquesne West: expected to begin May 2025
  - Confirmation drilling on Lac Pelletier: Q3, 2025
  - Updated Mineral Resource Estimate on Lac Pelletier: Q4, 2025
- **STRATEGIC INVESTOR, ROB MCEWEN:** Now owns 9.6%.

\*Power-Fardy and Breede, 2011. The Mineral Resource Estimate (MRE) constructed in 2011 is considered historical in nature as it was constructed prior to the most recent Canadian Institute of Mining and Metallurgy (CIM) standards (2014) and guidelines (2019) for mineral resources. In addition, the economic factors used to demonstrate reasonable prospects of eventual economic extraction for the MRE have changed since 2011. A qualified person has not done sufficient work to consider the MRE as-current. Emperor is not treating the historical MRE as current. The reader is cautioned not to treat it, or any part of it, as a current MRE.

# MANAGEMENT AND DIRECTORS

**Management & Advisory of >20 Public Mining Companies with >200 years of experience in the Public Mining Sector & Capital Markets.**

**Principals, Directors and Advisors own 10% of Emperor and have raised >\$1.2 Billion CAD for projects throughout exploration, development & production and returns to shareholders.**

**Management awards include TSX Venture 50™ and Developer of the year for the NW Ontario Prospectors Association.**

**Management affiliations include BHP, Placer Dome, Barrick, Teck, Detour Gold, Kirkland Lake, Agnico Eagle, Kaminak Resources, North Country Gold, Corriente Resources.**

**Successful track record for growing resource deposits, selling them to major mining companies and taking mines into production.**

## **JOHN FLOREK - M.SC., P.GEOL.** **President, CEO, & Director**

+35 years of technical and senior management experience working for major and junior mining companies, including roles as Founder, VP, and Director. He has helped identify and develop significant asset value for mines and exploration projects from grass roots through to development. John has worked for several majors including, BHP, Placer Dome, Barrick, Teck, and Detour Gold/Kirkland Lake Gold/Agnico Eagle.

## **ALEX HORSLEY** **Corporate Development, IR & Director**

+20 years of experience in the mining sector and capital markets with a focus on investor relations, finance, marketing, management, corporate development, and communications. Extensive network of Investment Bankers, Mining Analysts, Investment Advisors, High-net worth investors and Mining Professionals. Founder, and former CEO, of Emperor Metals.

## **JOHN LABREQUE - M.SC., P.GEOL** **Exploration Manager**

+26 years of global experience spanning North America, Africa, and Asia. Extensive expertise in gold, porphyry copper, and diamond systems, along with a proven track record in both exploration and production. Notably, he was part of the team that received the 2008 Developer of the Year Award at Hemlo Gold Mines, Ontario.

## **JOHN WILLIAMSON - P.GEOL.** **Independent Director & Chairman**

+35 years of experience in the global mining sector. John has been chairman and founder of >20 successful companies. He is the Founder of the Metals Group of companies, having raised more than \$1 B CAD.

## **SEAN MAGER - B.COMM.** **CFO & Director**

+30 years of experience in the mining sector, extensive corporate development, stakeholder relations, regulatory, financial, operating expertise and Co-Founder of Metals Group.

## **IAN HARRIS - B.SC. ENG. – Mining Engineer** **Independent Director**

+25 years of experience in the global mining sector, accomplished senior mining executive leading mining projects from open-pit and underground development to processing operations. Previously VP and Country Manager for Corriente which was taken over for \$690 million USD.

# CAPITAL STRUCTURE

As of April 2025

|                      |             |
|----------------------|-------------|
| Shares Outstanding   | 136,081,060 |
| Working Capital Est. | \$1.3 M CAD |
| Warrants             | *32,524,747 |
| Options              | *10,275,000 |
| Fully Diluted        | 178,880,807 |

## Rob McEwen

*"I am pleased with the progress Emperor Metals has made on the Duquesne West Gold project and the recent acquisition of the Lac Pelletier project. The company's innovative use of AI and machine learning for project evaluation and resource modelling is truly unique, and I am excited to see how these advancements will drive future growth"*

# FLAGSHIP DUQUESNE WEST GOLD PROJECT

## RICH HISTORY OF PROLIFIC MINING

- The Abitibi Region is one of the world's most prolific gold producing districts with ~200 million ounces of gold produced to date<sup>1</sup>
- Total historical gold production from the many high-grade gold deposits along the east-west trending PDFZ exceeds 110 million ounces<sup>1</sup>
- The Porcupine-Destor fault zone (PDFZ) transects the property.

## TOP TIER 1 MINING JURISDICTION

- Located in the Noranda Mining Camp surrounded by 50 historical and active mines
- Mining-friendly, low-risk and safe location
- Government-maintained road access to the property
- Low-cost green energy solutions (Hydro-electric).
- Local Mills under capacity or sitting idle, potential toll agreements

## INFRASTRUCTURE

- Surrounded by producing mines and development projects including 8 of Agnico Eagles, McEwen Mining, Eldorado among others
- Highway 101 running through the project.
- Railway, Power Lines, Water

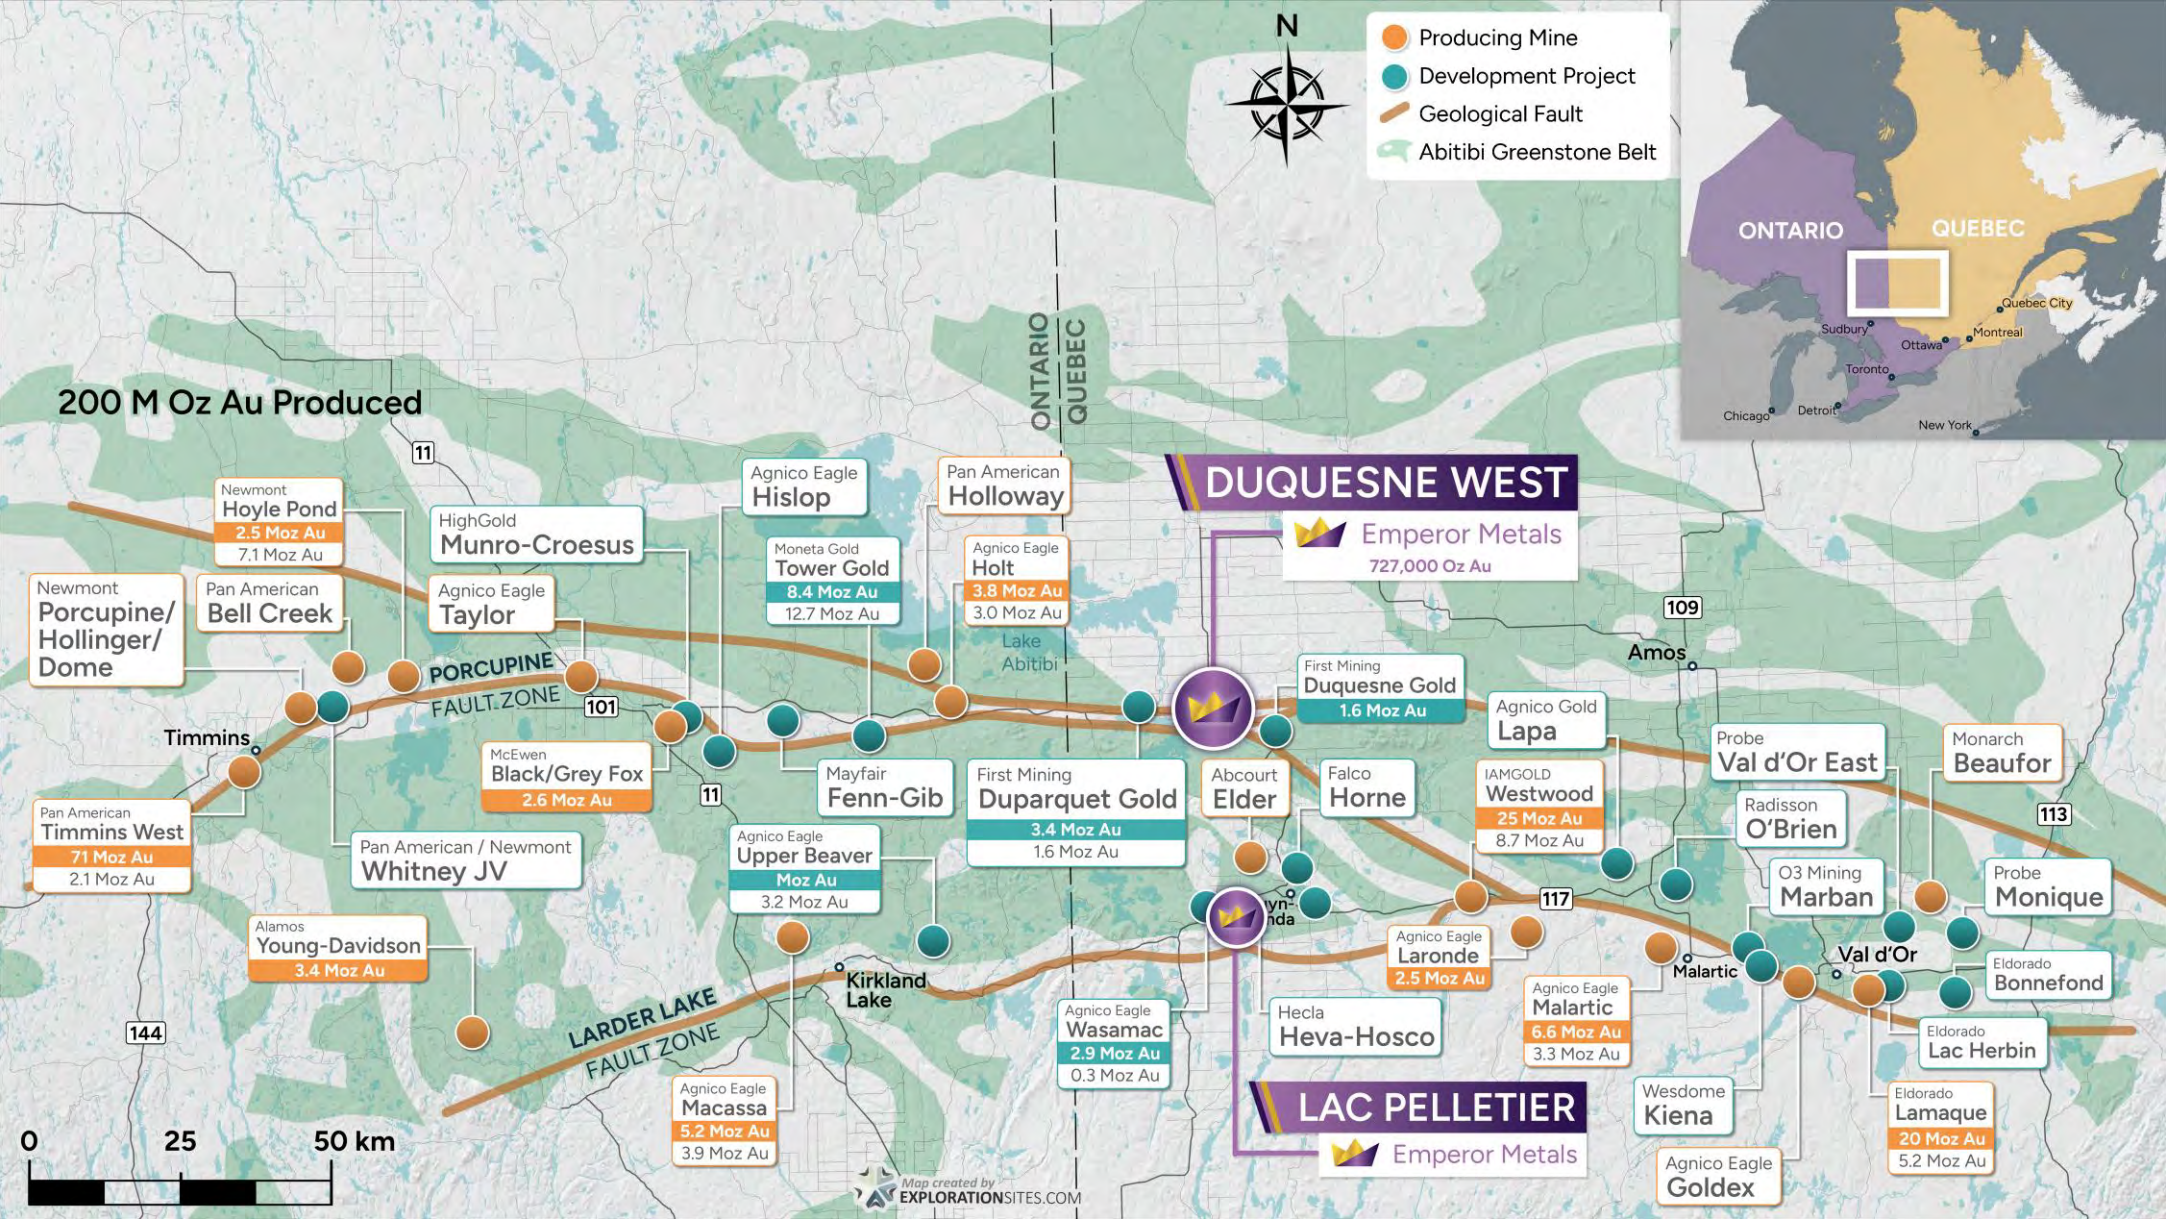

<sup>1</sup> Resident Geology Reports and Other Public Sources. Ontario Geological Survey Open File Report 6384 Report of Activities, 2021 Resident Geologist Program

# TIER 1 DISTRICT – Abitibi Greenstone Belt

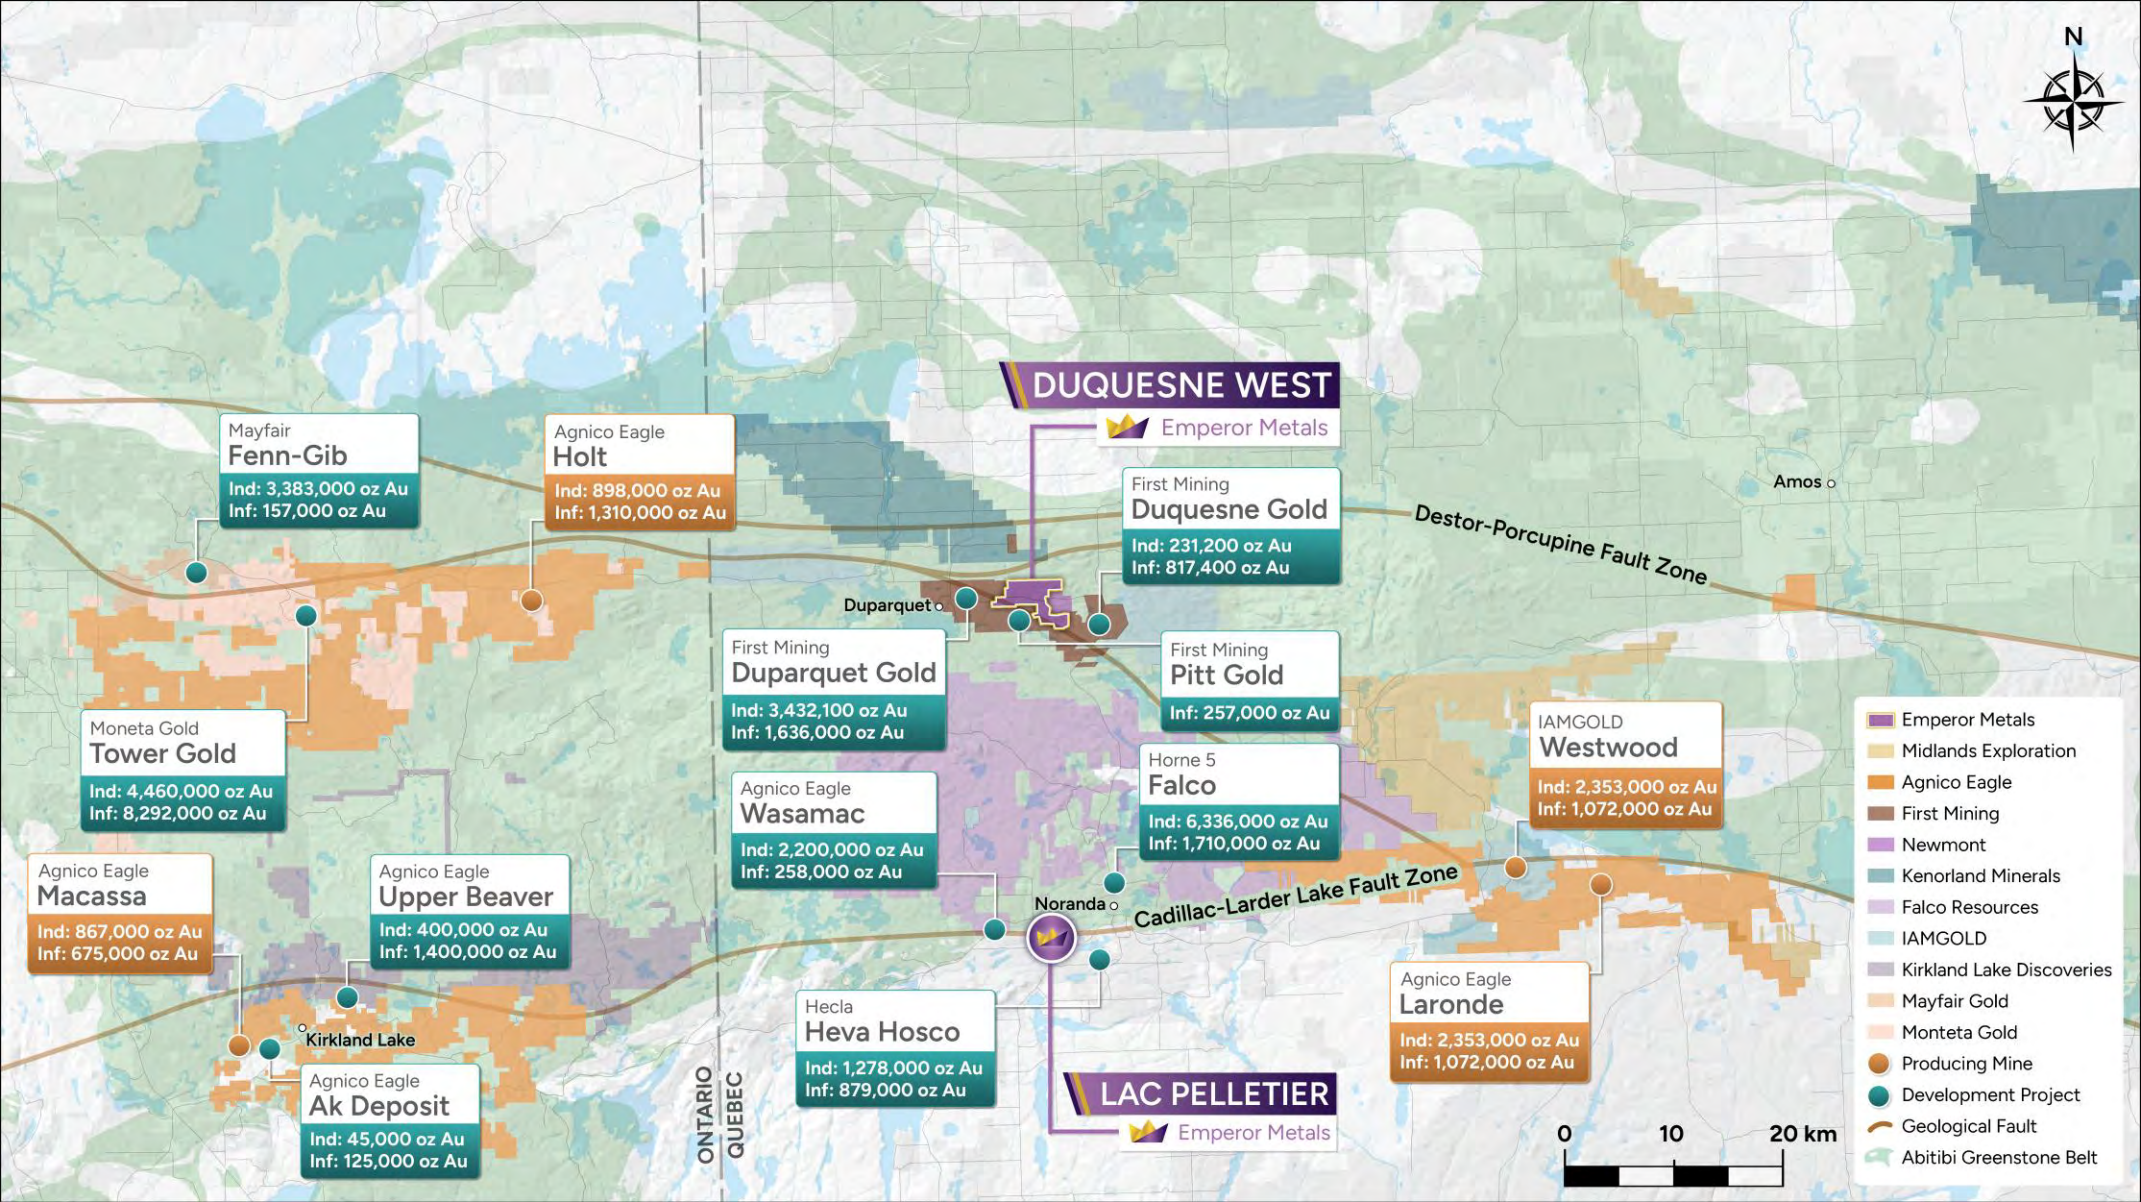

## HISTORIC PROLIFIC AND PRODUCTIVE MINING

# DISTRICT OWNERSHIP

## NEIGHBORHOOD DEPOSITS

# AI MACHINE LEARNING

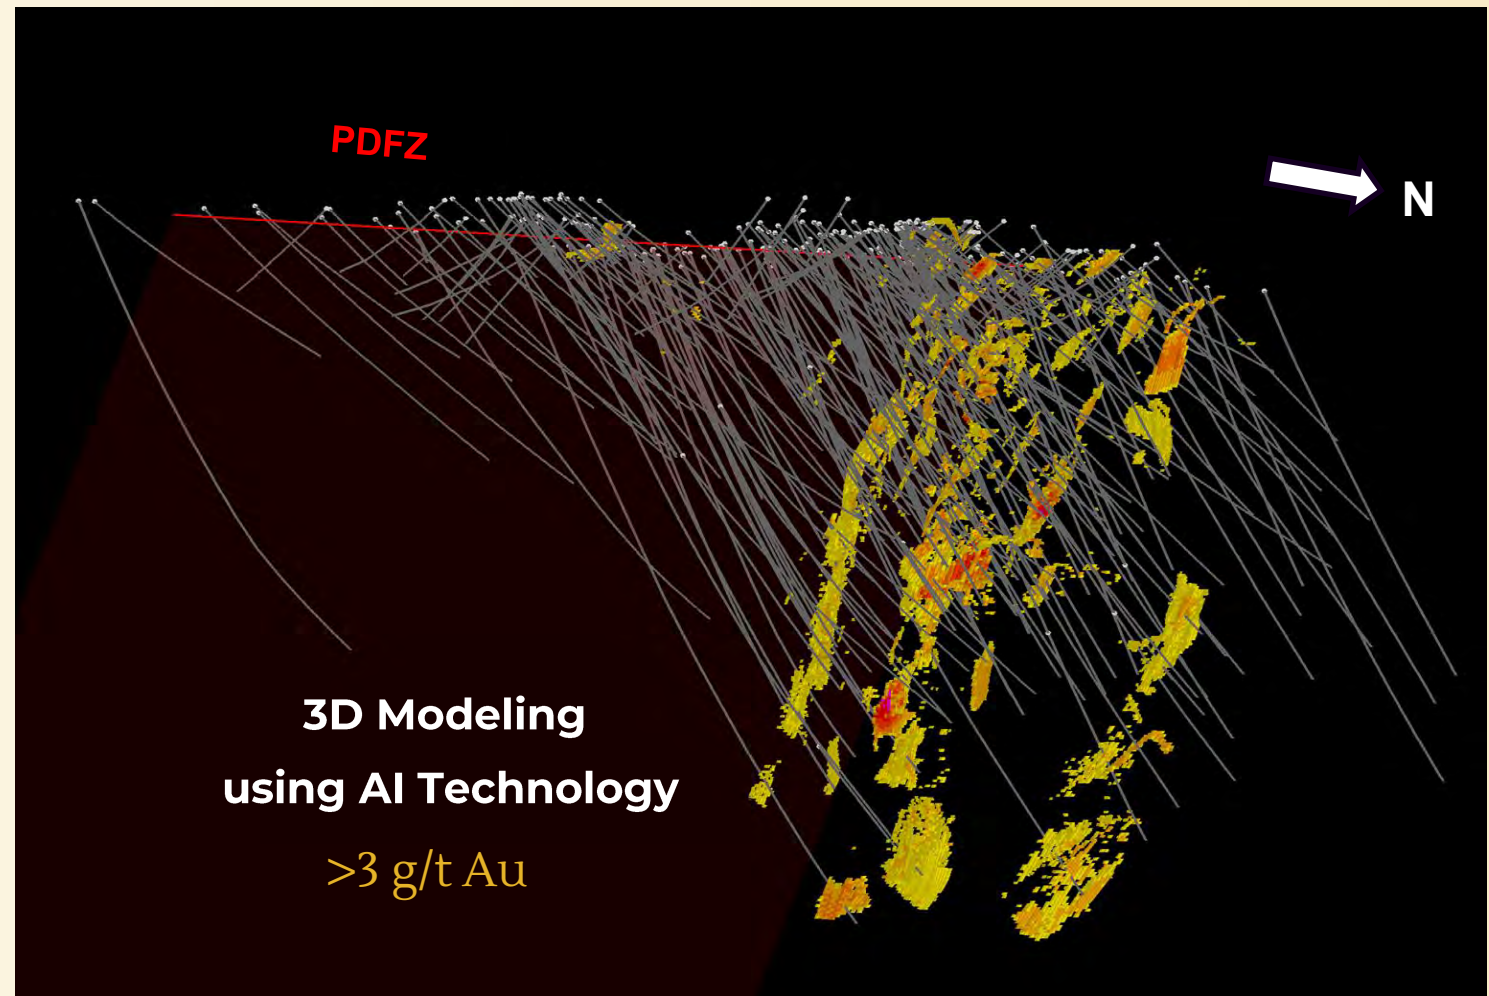

## THE DUQUESNE WEST GOLD PROJECT

### Advantages of AI

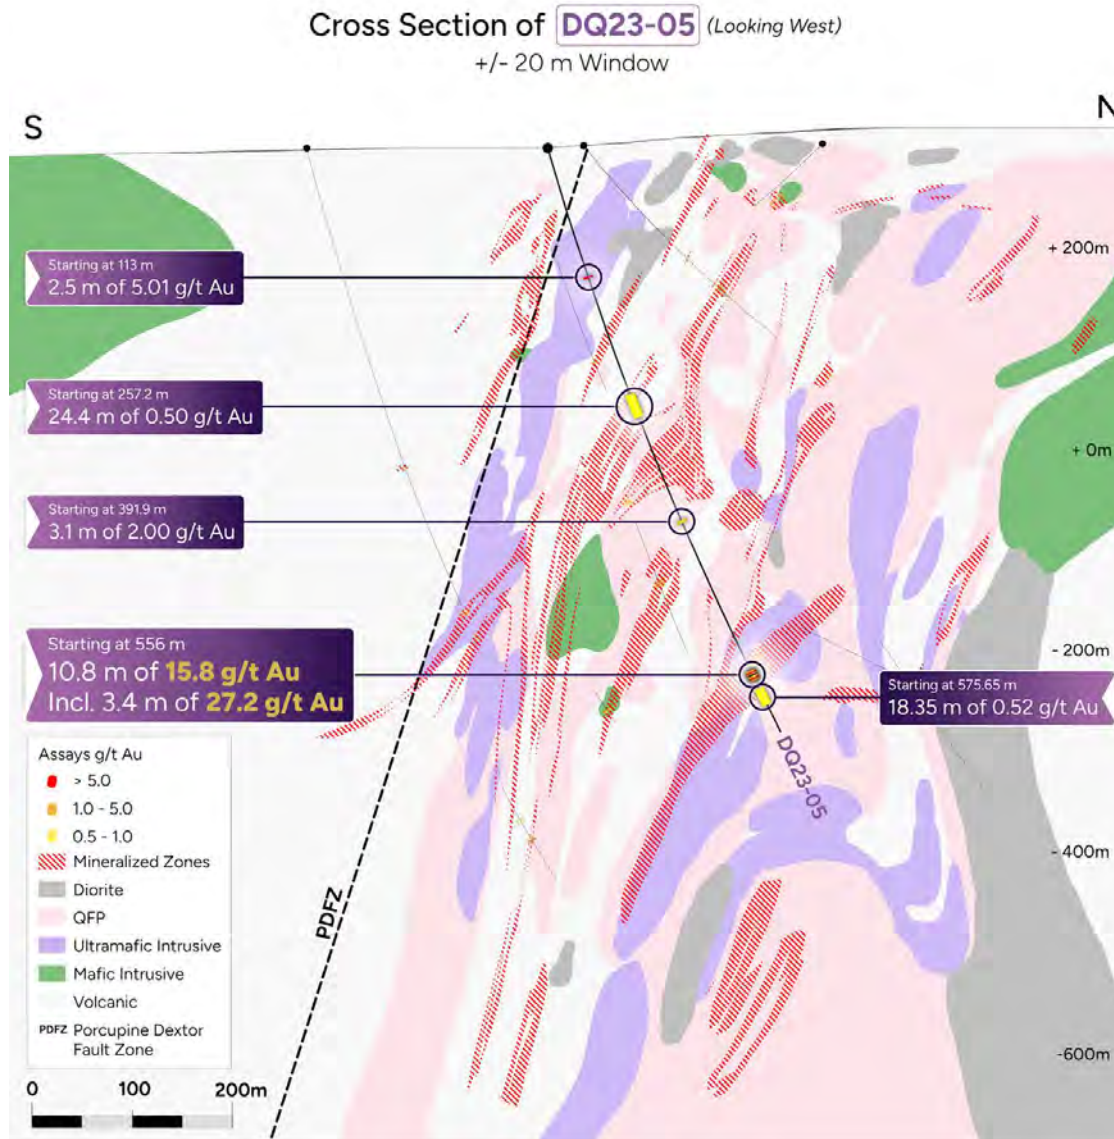

- **Increased Efficiency:** AI automates data analysis, expediting exploration workflows and optimizing resource allocation
- **Improved Accuracy and Precision:** Machine learning minimizes human bias, ensuring accurate identification of mineralization patterns and structural controls
- **Enhanced Resource Estimation:** AI and machine learning handle large datasets, enabling efficient and accurate resource calculations

### Emperor Metals use of A.I. to date

- Successfully implemented AI and machine learning for the Duquesne West Gold Project
- **First 3D Model:** AI and machine learning created a comprehensive 3D model of the deposit, improving visualization and project communication
- **Geological Model and Drill Target Definition:** AI algorithms interpreted data, generating a precise geological model and assisted in identifying high-priority drill targets

# AI GEOLOGICAL MODEL

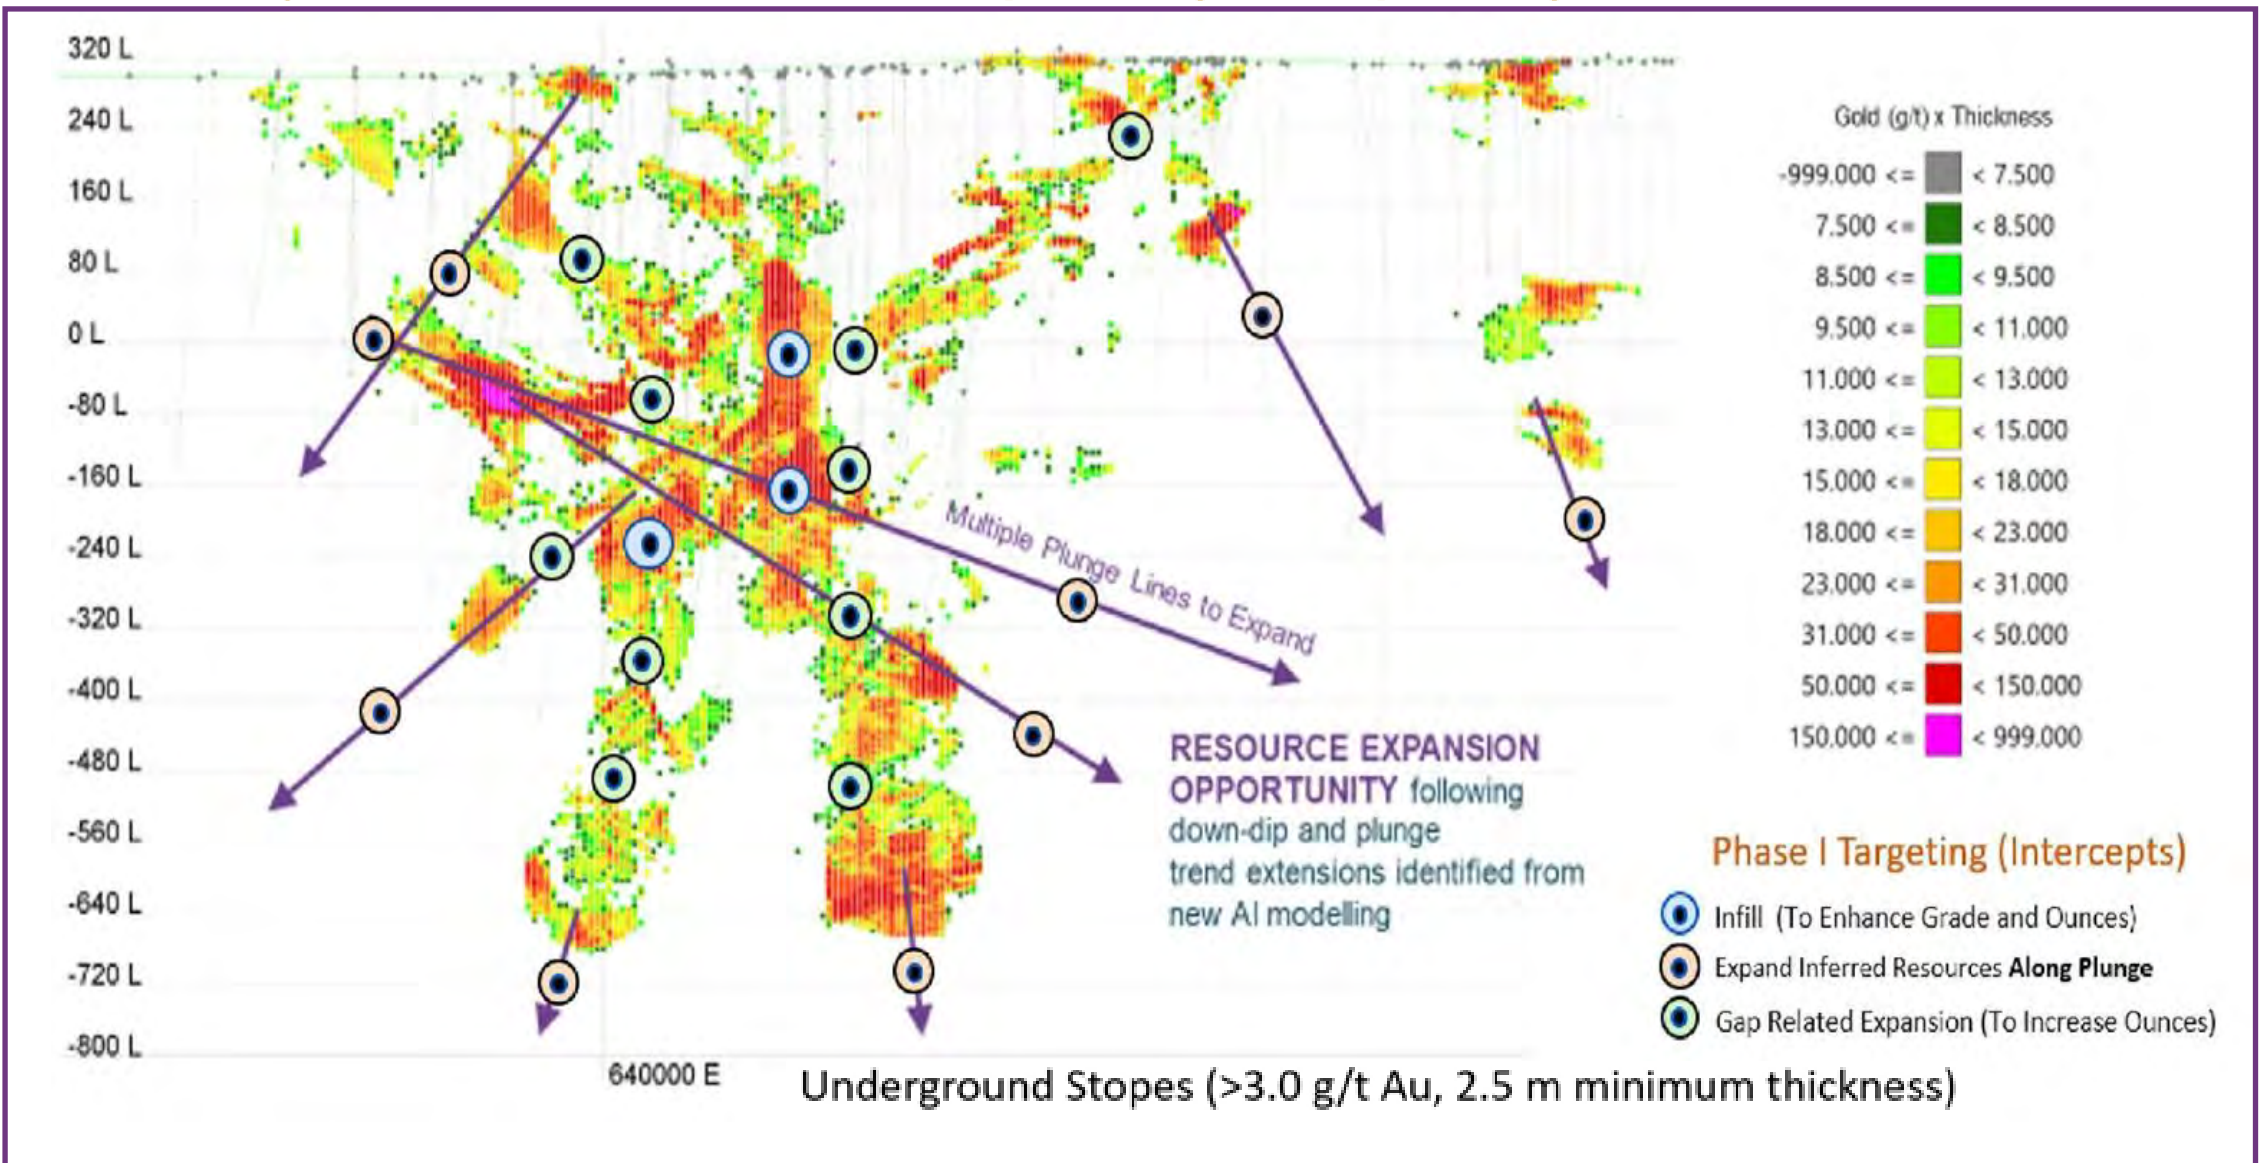

- First ever geological model on property (AI Developed)
- Illuminates' competency contrast for previously unrecognized additional mineralized zones/ targets
- Enlightens the controls to mineralization, with better targeting
- Helps in the understanding to resource expansion
- Image shows the AI geological model and drill hole DQ 23-05 highlighting **10.8 m of 15.8 g/t Au incl. 3.4 m of 27.2 g/t Au**
- Gold mineralization within many rock types showing widespread gold mineralization and potential for significant resource expansion

# 2023 AI 3D MODELLING TARGETS

## Preliminary Model - Grade x Thickness (Looking North) – Long Section

# POTENTIAL STOPE GRADE AND THICKNESS

| GRADE (Au, g/t) | STOPE THICKNESS (m) |
|-----------------|---------------------|
| 22.043          | 5.40                |
| 16.255          | 11.11               |
| 15.860          | 11.38               |
| 15.669          | 11.37               |
| 15.399          | 14.68               |
| 14.249          | 14.75               |
| 13.991          | 16.81               |
| 13.701          | 19.41               |
| 12.854          | 15.76               |
| 10.850          | 15.80               |
| 7.381           | 17.13               |
| 6.661           | 17.85               |
| 5.256           | 20.80               |

## CRITERIA USED

- Minable Shape Optimizer (MSO) used Gold Cutoff of 3 g/t Au and Gold Cap of 30 g/t Au
- Minimum dimensions 2.5 m (width) x 8 m (length) x 4 m (height)
- We used ID3 (Inverse Distance Cubed) for estimation in the AI modeled grade shells

Inspecting core

# PHASE I ASSAYS AND CORE

## SUMMER 2023 DRILLING – DQ23-01 & DQ23-05

DQ23-01 (11.7 m of 5.63 g/t Au) core depth of 531.3 m

DQ23-05 (10.8 m of 15.8 g/t Au (includes 3.4 m of 27.24 g/t Au)

DQ23-02 (10.65 m of 3.97g/t Au (includes 5.0 m of 5.34 g/t Au))- core depth of 540.25 m

DQ23-02 (25.0 m of 1.69 g/t Au)

# 2023 DRILLING HIGHLIGHTS

Maiden 2023 drilling completed November 2023, for a total of 8,579 m

| Hole No.        | FROM (m)      | TO (m)        | Interval (m) | Au (g/t Au)  | Expansion Target   |

# OPPORTUNITY

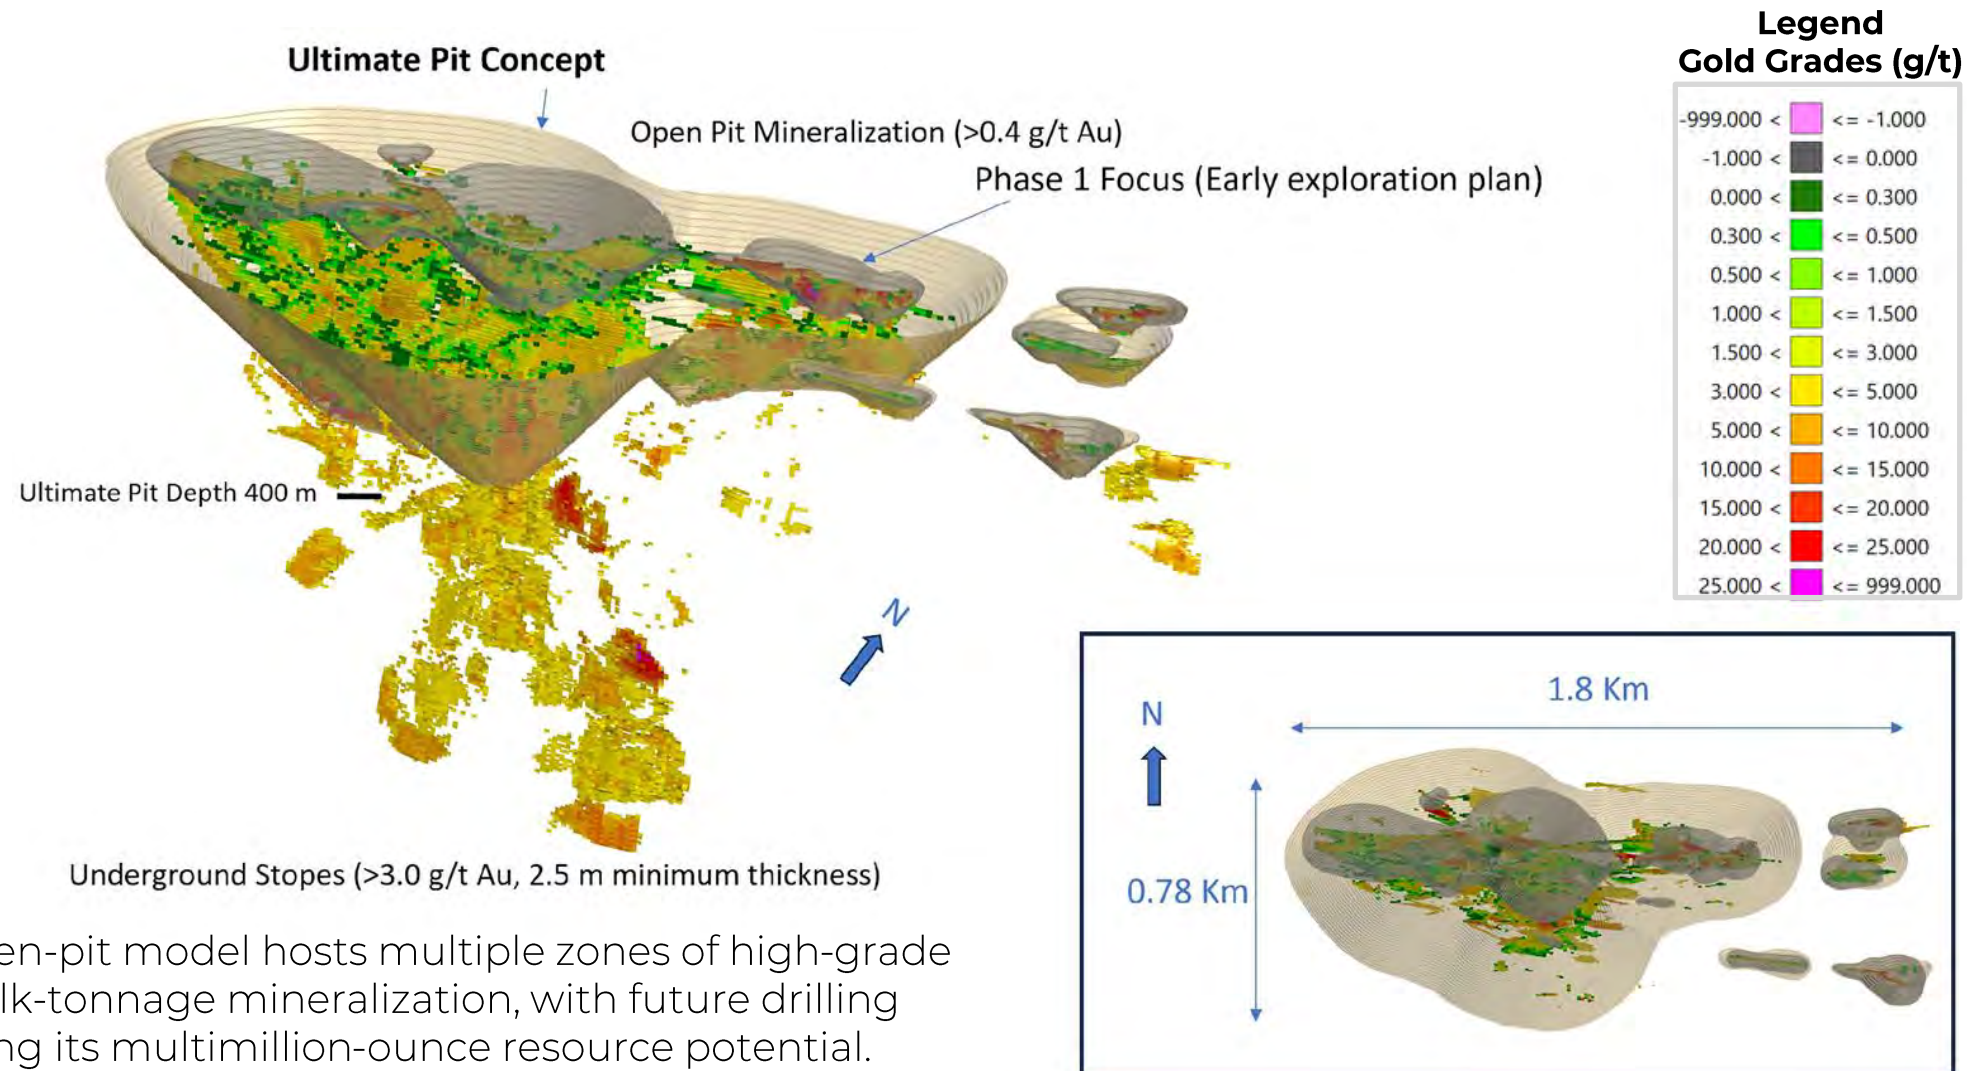

## Pending Assay Results From Historic Core

# OPEN PIT CONCEPT

## SHOWING BOTH PHASE 1 AND ULTIMATE PIT SCENARIO

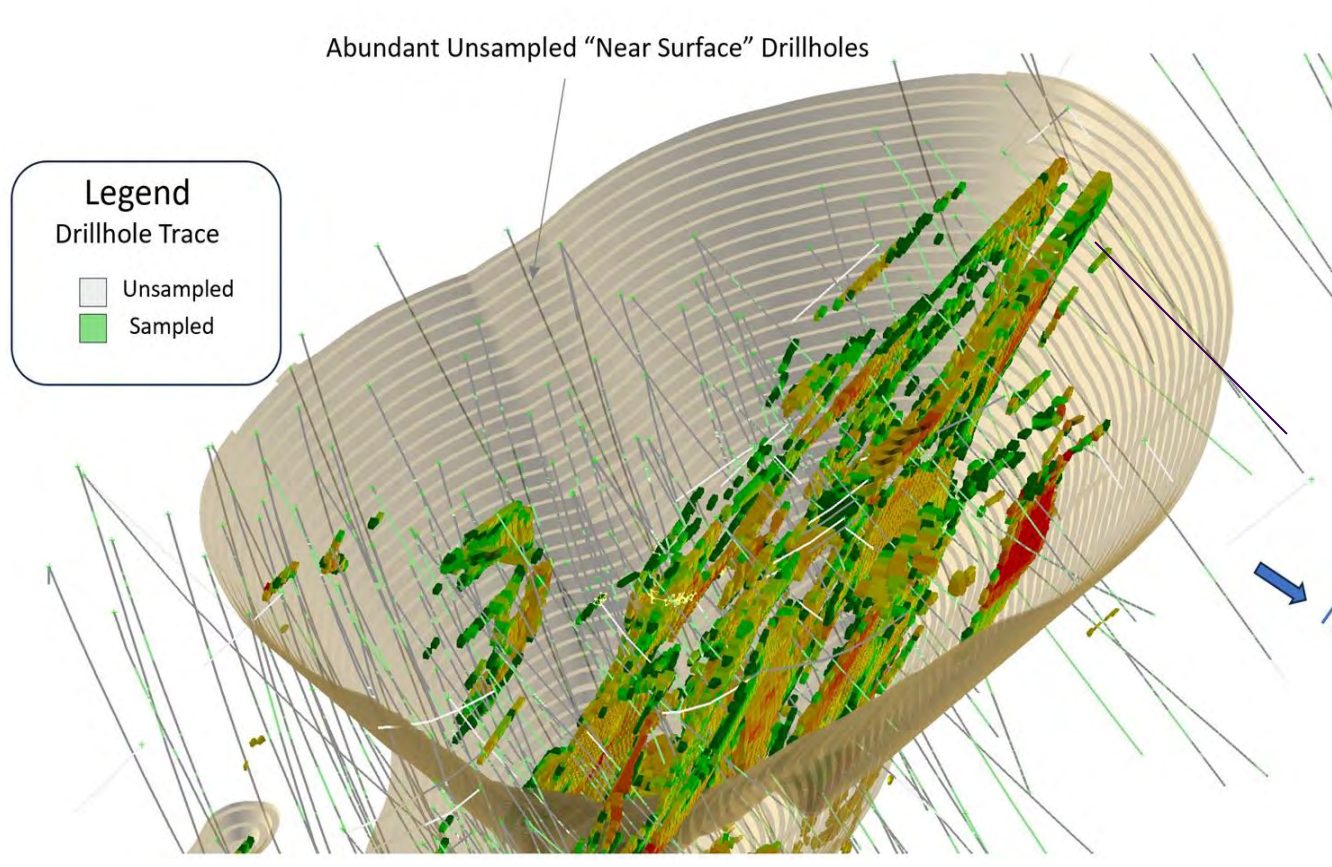

The open-pit model hosts multiple zones of high-grade and bulk-tonnage mineralization, with future drilling targeting its multimillion-ounce resource potential.

# OPEN PIT CONCEPT

## HISTORICAL DRILL HOLES (DDH) IN OPEN PIT

It is estimated around 50% of historical drill core from surface to 500 meters is unsampled/assayed because previous operators overlooked the open pit potential. 2,500 m of historical core was assayed in 2023 successfully adding to the resource footprint and another 8,000 m are being sent for assay in 2024.

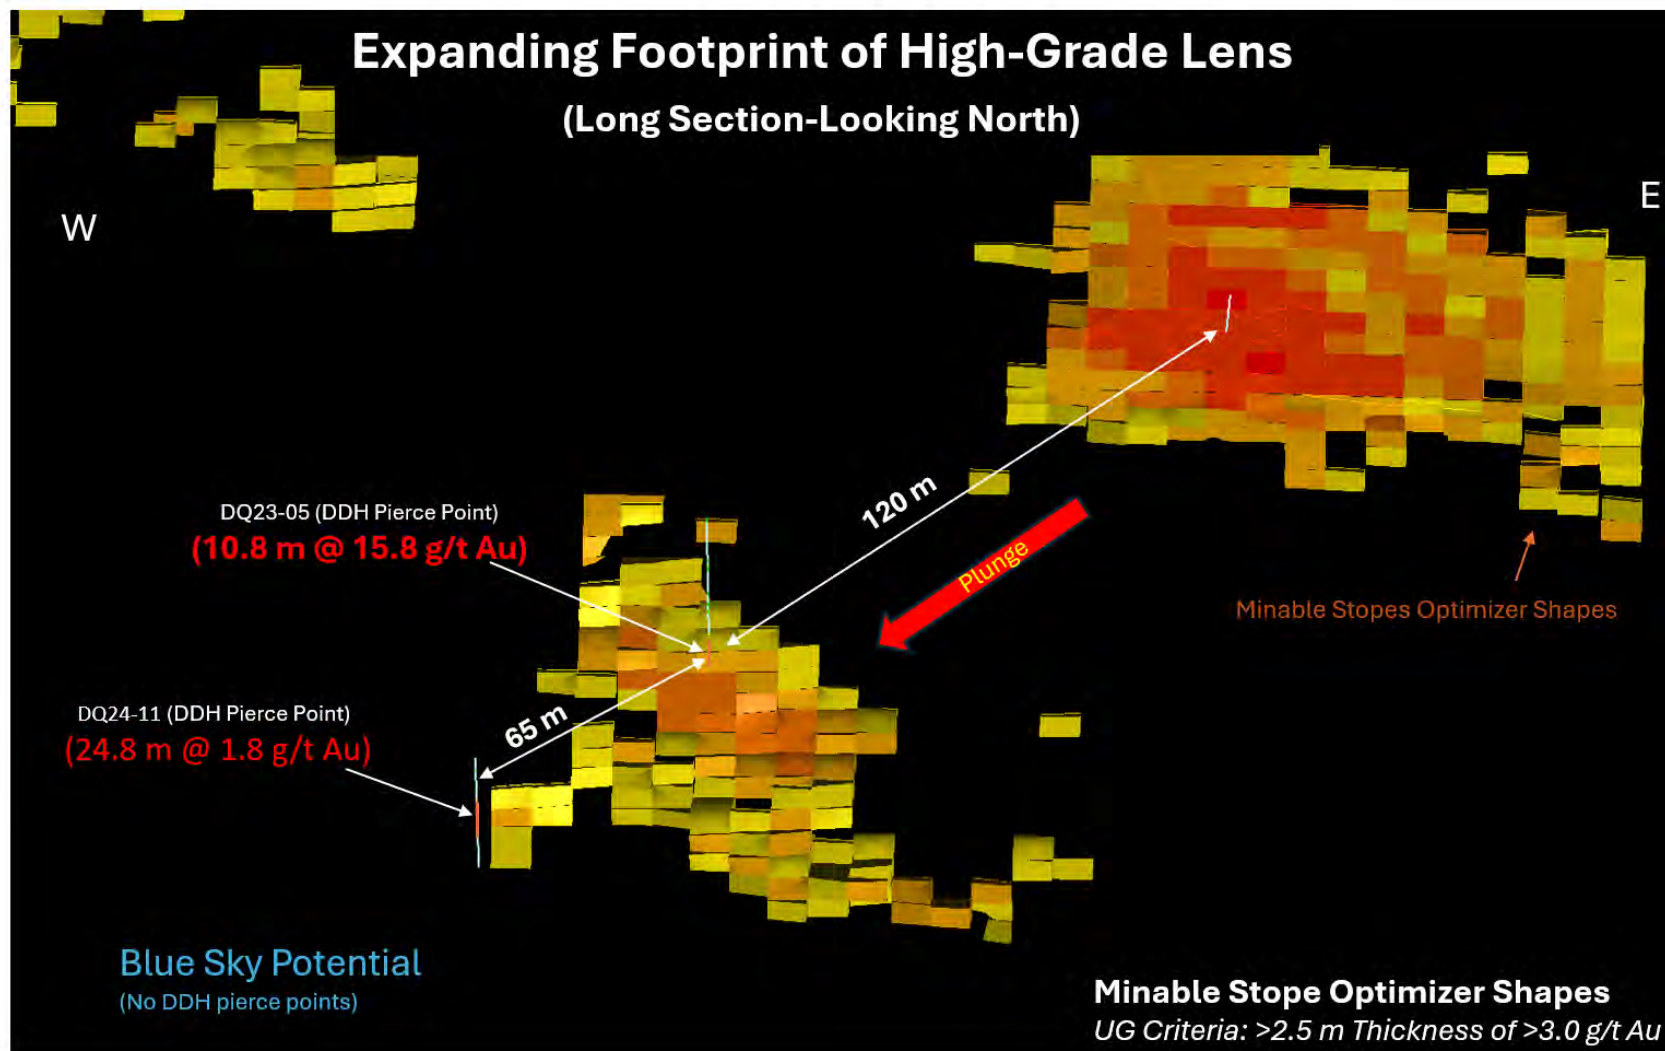

Historical Drill Holes (DDH) in Open Pit, showing lack of sufficient sampling for proper resource characterization

Un assayed Quartz-Feldspar-Porphyry (QFP) in Open Pit environment

# LONG SECTION OF DQ-23-05 and DQ24-11 INTERCEPT

10.8 m of 15.8 g/t Au and 24.8 m @ 1.8 g/t Au

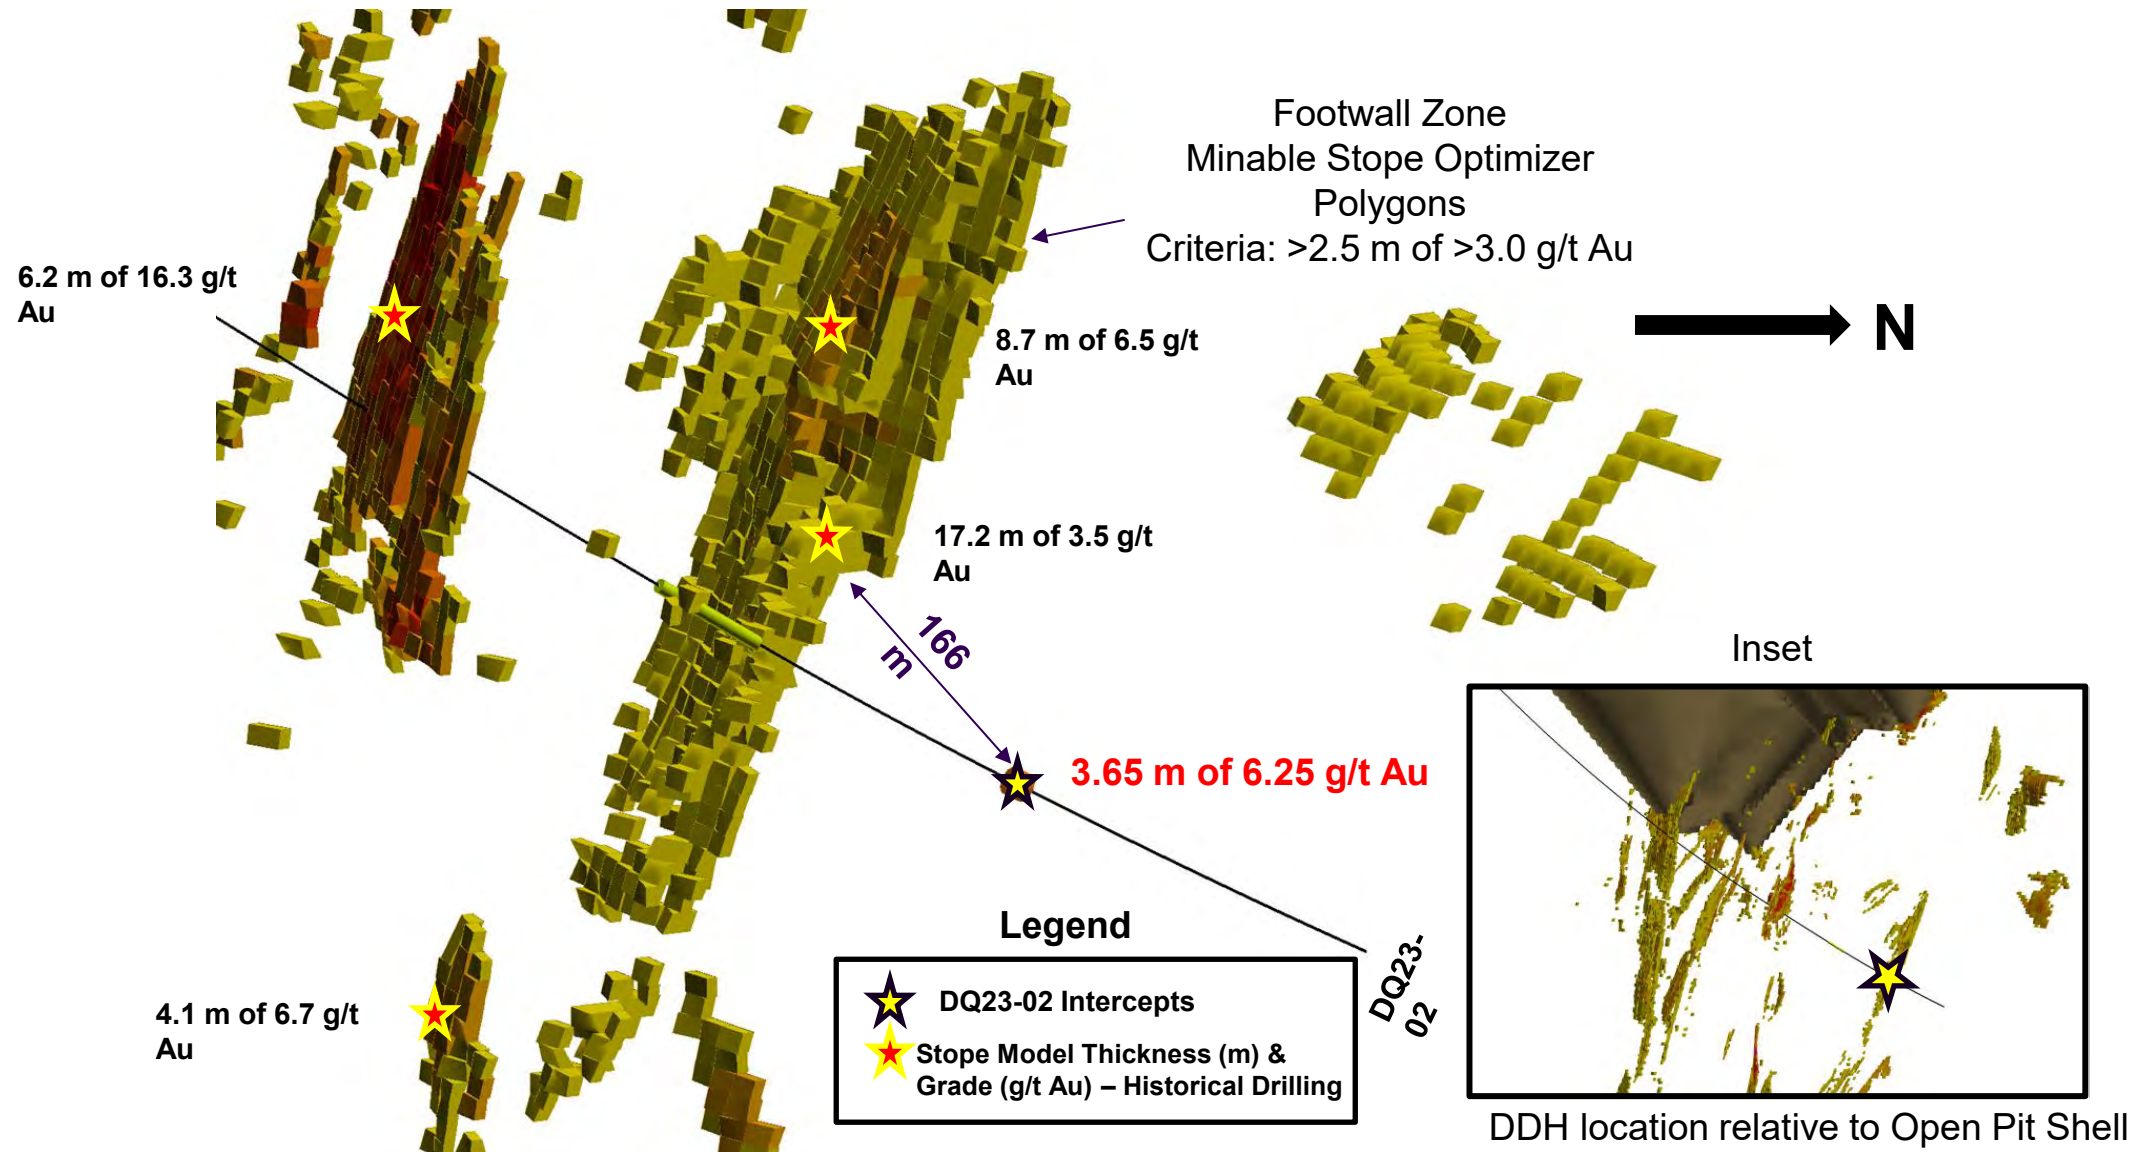

- Increasing ounces!
- Expanding footprint of high-grade zones significantly

## HISTORICAL CORE ASSAYS HIGHLIGHTS TO DATE

10,500 m of historical core

# GEOPHYSICS 2023

- ✓ A 424 line-km aeromagnetic geophysical survey comprising of 14.5 km<sup>2</sup> was completed at the Duquesne West Gold Project in February 2024.
- ✓ The survey enhances Emperor's exploration strategy by refining geological models and targeting capabilities for gold deposition.
- ✓ Used to assist the company in expanding the footprint of known mineralization and defining near surface targets ahead of the 2024 drill program.

## SURVEY HIGHLIGHTS

- **Enhanced Aeromagnetic Resolution:** Achieved with 50 meter and 25 m line spacing providing new and improved detail.
- **Advanced Geological Understanding:** Advances Emperor's understanding of the structural framework and lithological controls crucial to mineralization
- **Revealed Greenstone Belt Architecture:** Illustrates the underlying architecture of the greenstone belt; pinpointing areas to favorable ore environments.
- **Discovery of Unknown Structural Features:** Reveals unknown structural features not identified by past explorers, offering new exploration targets.

## UNDERGROUND WORKINGS WITH POTENTIAL STOPES

- Historical mineral resource of
  - 89,400 Oz Au Measured & Indicated at 4.08 g/t Au and 137,600 Oz Au at 3.89 g/t Au is contained in several zones of mineralization
- 105,000 meters of drilling has been completed (both above ground and underground)
- Over 3.3 km of underground development is in place, including portal, and vent raise with only limited bulk sample mining
- Two bulk samples (2009 –2010) with an average recovery of 96.3% (2,950 oz Au recovered @ 4.35 g/t Au)
- Potential for both robust thickness and high-grade resource expansion with diamond drill hole intercepts of 22.4 m of 7.6 g/t Au and 6.2 m of 24.8 g/t Au
- Very close to infrastructure in area; within Rouyn municipal limits
- Potential pre-production scenario
- Estimated +\$70 Million spent in expenditures on infrastructure and drilling on site (today's terms)
